

Exit Slip – Nested Conditional Statements

AI in Action – Level 2 | AIJD1.9 | Student copy

Name: _____ Class: _____ Date: _____

Answer each question on your own. This is a quick check of what you learned today – do your best!

1. A **nested** conditional statement is: a) an IF block inside another IF block b) two IF blocks one after the other c) a loop

2. Read: *if (number > 0) then { if (number > 100) then say "big" else say "small" } else say "not positive"*

What is said when number = 50? _____ when number = 200? _____ when number = -3? _____

3. In the Remainder Problem, which operator gives the remainder of a division? a) + b) mod c) round

4. Draw or describe a nested IF for a ticket price: under 5 years = free; otherwise, if student = 2 JD, else 5 JD.

Score: _____ / 4

Exit Slip – Nested Conditional Statements

AI in Action – Level 2 | AIJD1.9 | TEACHER ANSWER KEY

1. A **nested** conditional statement is: a) an IF block inside another IF block b) two IF blocks one after the other c) a loop

Answer: a) an IF block inside another IF block

2. Read: *if (number > 0) then { if (number > 100) then say "big" else say "small" } else say "not positive"*

What is said when number = 50? _____ when number = 200? _____ when number = -3? _____

Answer: 50 → "small"; 200 → "big"; -3 → "not positive"

3. In the Remainder Problem, which operator gives the remainder of a division? a) + b) mod c) round

Answer: b) mod

4. Draw or describe a nested IF for a ticket price: under 5 years = free; otherwise, if student = 2 JD, else 5 JD.

Answer: if age < 5 then free else { if student then 2 JD else 5 JD }
